Power Lift Recliner Position Reference

The Oasis Collection is a **true-infinite position** power lift recliner. True-infinite position Pride Power Lift Recliners enable the backrest and footrest to move independently from one another to achieve a variety of positions.

 2-Position (TV Recline) TV recline can be achieved on all Pride Power Lift Recliners. This features a partially elevated footrest and a slightly reclined backrest.	 Zero Gravity Position The zero gravity position can be achieved with infinite-position Pride Power Lift Recliners. This places the thighs and lower legs higher than the torso.
 3-Position (Full Recline) Full recline can be achieved on 3-position Pride Power Lift Recliners when the footrest is fully elevated.	 Trendelenburg Position The Trendelenburg position elevates the feet higher than the head for increased comfort and relaxation.
 True-Infinite Position True-infinite position Pride Power Lift Recliners enable the backrest and footrest to operate independently to achieve various positions — including TV recline, full recline, zero gravity, and Trendelenburg.	

***Pride® Power Lift Recliners are FDA Class II Medical Devices designed to aid individuals with mobility impairments.**
